- Cyber Security Training
- Aviation Training
- Small Arms Training
- Aviation Maintenance Services
- Fuel and Fixed Base Operator Services
- Full Mission Profile
- Small Arms Maintenance
- Other Specialized Services

RESICUM

INTERNATIONAL LLC

INTERNATIONAL INTELLIGENCE & SOUND PROCESSES

Since our inception, Resicum has been an international company. Our first contracts, providing intelligence training to Mexico, set the tone for company.

The founding members speak multiple languages and/or have spent their careers working overseas.

Resicum has invested in the processes, technology and people to continuously improve and build on our past performance.

RESICUM

INTERNATIONAL LLC

TACTICAL TRAINING

Resicum owns and operates 1,000 acres of available training areas at an elevation of 166 feet. Our facility includes an 8,002 by 150 feet asphalt runway which can support tactical aircraft. We host government and contractor training teams for:

Full Mission Profile

Small Arms Training

Military Free Fall

Waterborne Operations

Small Unit Tactics

... and more.

Resicum's training experience includes Surveillance and Reconnaissance, Small Unit Tactics, Tactical Medicine, Pistol and Rifle Marksmanship, Survival, Full Mission Profile Support, Personnel Recovery, Asset Recovery, 1000 meter+ Marksmanship, Close Quarters Battle, UAS/UAV Operations, Simulated Training Environments, Defensive Driving, Riverine, Water Borne Operations, Military Free Fall and Airborne Insertion. Resicum provides tailored curriculum, courseware and POI from our library of available courses.

Our mobile training teams travel globally to train small arms tactics to various government and commercial customers.

RESICUM

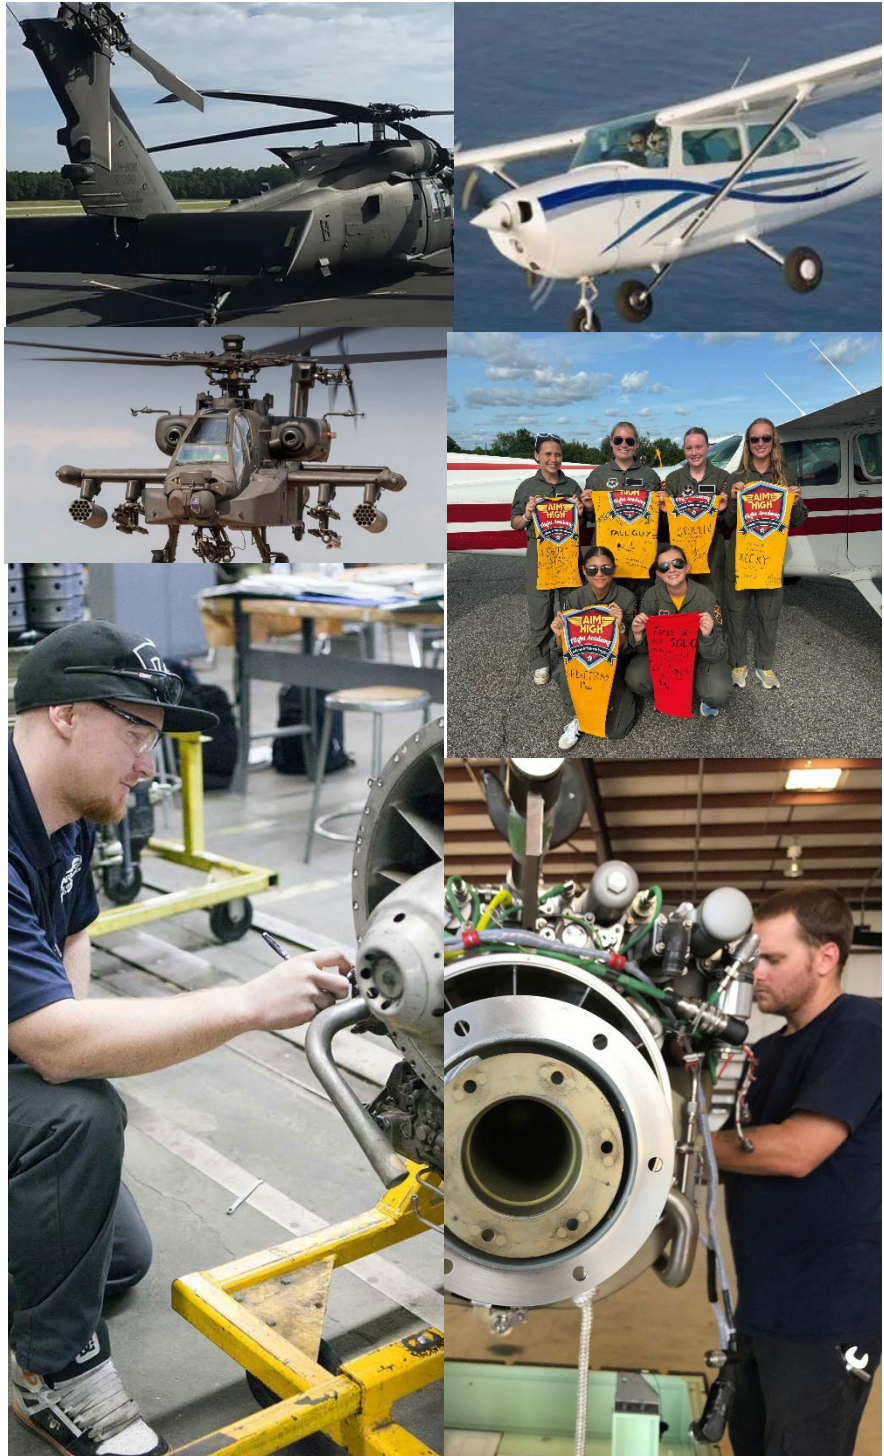

INTERNATIONAL LLC

AVIATION TRAINING

Resicum provides aviation training for new pilots and maintenance crews on advanced weapons systems such as the AH-64E V6. We are the only company allowed to self-start our pilots on overseas missions.

Our civil aviation training expertise led to a win on the Aircrew and Maintenance Training IDIQ and qualified us to supply Aim High training to new pilots as part of the US Air Force recruiting Program. From that program, Resicum has expanded to support community college aviation training programs in Alabama and is now growing our accelerated flight training and maintenance training programs.

For advanced weapons systems training, Resicum trains personnel across both maintenance and aircrew requirements, from rotary to fixed wing jets at our facilities or the customer's facilities.

RESICUM

INTERNATIONAL LLC

OTHER MISSION TRAINING

Resicum provides a variety of mission training worldwide including cyber security, digital forensics, intelligence and counterintelligence, intelligence, surveillance and reconnaissance, and mission sensor operator training.

Resicum has worked together with subcontractors and clients to develop customized training solutions to meet their needs and budgets.

Resicum has built our IDIQ and GSA offerings to enable rapid purchase of our services. This includes the ability to process government purchase card payments.

OTHER MISSION SUPPORT

Resicum provides comprehensive mission support services for government and commercial customers including:

Fixed Base Operations and fuel management

Curriculum and Training Development

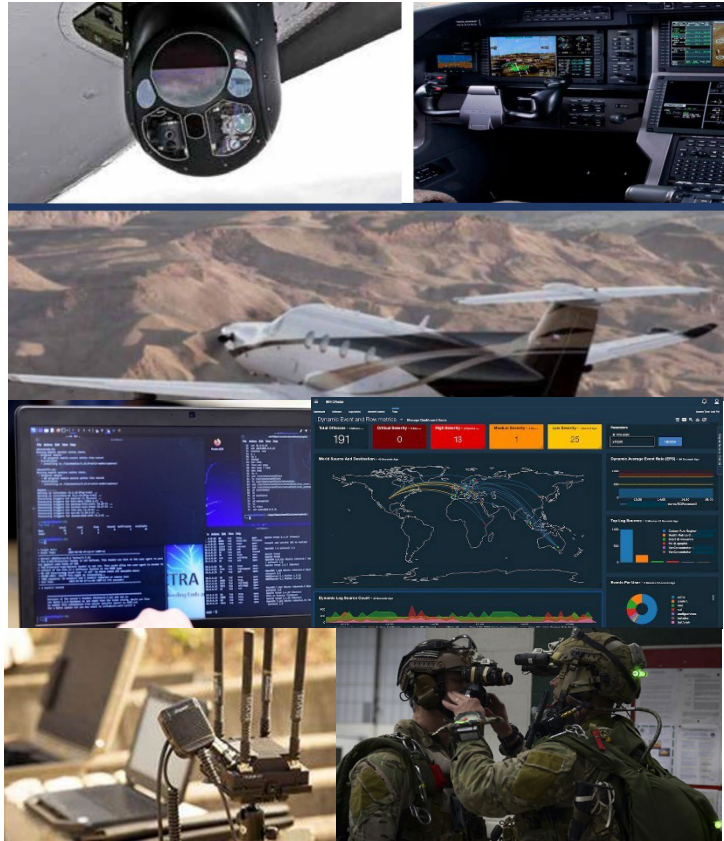

Part 145 Maintenance Operations

Program Management Solutions

Information Technology Solutions including programming

Procurement Solutions especially for aviation parts and ammunition

Mobile Maintenance Teams
